Guest lecture by Visiting Professor Nashwan Dawood

**THE CONSTRUCTION REVOLUTION -
FROM THE UK PERSPECTIVE**

**Thursday October 25, 13:00 - 14:00.
Room F-108, Sohngaardsholmsvej 57
Aalborg University,**

Professor Nashwan Dawood lecture on this subject will cover aspects of business process transformations, R&D and industry relations, innovation processes, IT and use of Virtual Reality in the construction applications.

Professor Nashwan Dawood (N.N.Dawood@tees.ac.uk) is Professor in Construction Management and Chair of the School Research Policy at the University of Teesside (UK), School of Science and Technology, Division of Civil Eng. and Building, UK. He is also initiator of a worldwide research network within Virtual Reality in construction.

Professor Dawood has many years of experience from research within VR in the construction processes, risk management, intelligent decision support systems, cost forecasting and control and business processes. He also has deep knowledge on strategies for prosperous collaboration and progress between university and industry in the IT in Construction domain.

You are all very welcome

Per Christiansson
Professor
IT in civil Engineering

Department of Building Technology and Structural Engineering
